

Owensboro Grain Tank Car Decal Placement Diagram

GATX Cars

By Jay Ramsey

This decal set was produced using the photo below. It only includes the heralds, numbers, and most of the data found on the prototype.

GATX #53569

~~Notes~~

- ▶ Body, trucks, and all hardware is painted black (we prefer PollyScale's Steam Power Black).
- ▶ Here are some confirmed Owensboro Grain GATX tank cars: 54238, 54522, 54540, 53571, 54576, 53578, 53586, 53594, 54604, 54754, 54785, 531566
- ▶ The set does not currently include the small data at the ends of the tanks, as we have yet to get a clear photograph of that portion of the car. When this information becomes available, the set will be reprinted. Please email us if you wish to receive the updated set.
