

PPG Covered Hopper Car Decal Placement Diagram PPGX and ACFX Cars

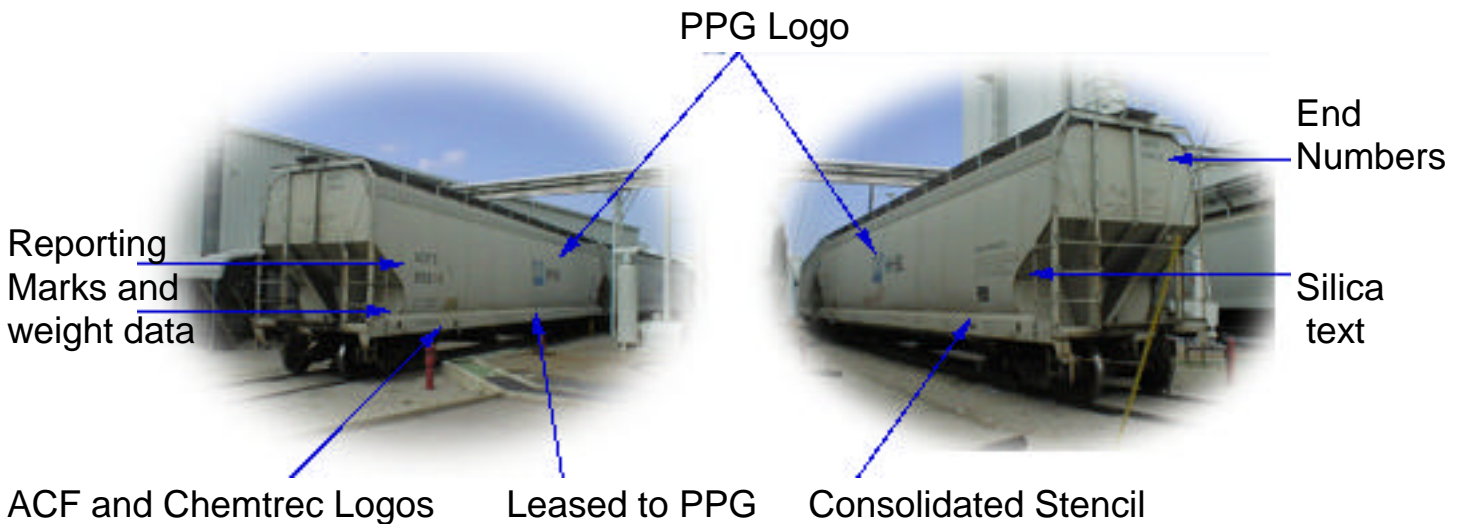

By Jay Ramsey

This decal set was produced using the photos below. There were two prototypes for this decal set, an ACFX leased car and PPG's owned cars. Lettering and numbers for both types are included in the set.

PPGX #12271

ACFX #69216

PPG Covered Hopper Car Decal Placement Diagram PPGX and ACFX Cars

~~Notes~~

- ▶ Body and all hardware is painted off white or light gray (hard to tell).
- ▶ Some of the lettering is different on the two cars. The following describe some of the specific details regarding the lettering:

PPGX Cars

'Do Not Hammer" text on sides

Chemtrec signs on ends and sides

Some text on the side of the car was not visible in our photos, and is not reproduced

ACFX Cars

Leased to PPG Industries below herald

Text regarding cleaning on side near end

Consolidated Stencil is further to the end

- ▶ The set does not currently include the small data at the ends of the car, as we have yet to get a clear photograph of that portion of the text. When this information becomes available, the set will be reprinted with the additional text. Please email us if you wish to receive the updated set.
